A;Title: Cloning of cDNA encoding a new peptide C-terminal alpha-amidating enzyme h A;Reference number: A27715; MUID:88134244
A;Accession: A27715
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           F:40-385/Product: peptidylglycine monooxygenase II *status predicted <MAT> F:133-344/Domain: peptidylglycine monooxygenase I homology <PGM> F:133-944/Domain: transmembrane *status predicted <TMN> F:764-787/Domain: transmembrane *status predicted <TMN> *status predicted <PMN> *status predicted <PMN> *status predicted <PMN> *status predicted <PMN *status predicted <P
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  C;Comment: This copper protein is one of two enzymes that catalyze the oxidation of p le and dismutates to 91yoxyLate and the corresponding desglycine peptide alpha-amide. hormones. The other enzyme is peptidyl alpha-amidating enzyme I.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               SUBMITTED (APR-1995) to the EMBL/GenBank/DDBJ databases.

-- FUNCTION: COMPONENT OF THE CUTICLES, IT FORMS A RIBBON
-- APPROXIMATELY 2 MICRONS WIDE RUNNING ALONG THE LATERAL LINES
UNDERNEATH THE ALAE. CONTRIBUTES TO THE FORMATION OF EXTRACELLULAR
ENVELOPES PROTECTING THE ORGANISM FROM THE ENVIRONMENT.
-- SUBCELLULAR LOCATION: SECRETED.
-- TISSUE SPECIFICITY: LOCALIZED IN A NARROW BAND NOT EXPOSED
TO THE EXTERIOR, RUNNING UNDERNEATH THE ALAE.
-- DEVELOPMENTAL STAGE: EXPRESSED DURING DAUER LARVA FORMATION.
-- DOWAIN: THE SMALL REPEATS A-A-P-[AVI] ARE ALSO PRESENT IN MANY
PROTEINS CONSTITUTING THE PROTECTIVE ENVELOPE OF OTHER SPECIES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   CUT1_CAEEL STANDARD: PRT; 424 AA. Q03755; Q18693; 01-FEB-1994 (Rel. 28, Created) 15-JUL-1998 (Rel. 36, Last sequence update) 15-DEC-1998 (Rel. 37, Last annotation update) CUTICLIN 1 PRECURSOR.
